Download and install Android 6.0 Marshmallow Beta over your Nexus 5. Update. Nexus 5 has been updated to Android 6.0 Marshmallow (Click here for link) Flash the ROM to your Nexus 5 using the fastboot method. Reboot phone by holding Vol Up + Home keys or by using the power button. Once the phone is rebooted, launch ADB. Enter the command adb devices You will see the list of available devices. Choose one of the devices (the phone you flashed with Marshmallow). Enter the command fastboot flashing unlock. This will initiate the unlocking process. Once the unlocking process is completed, again enter the command fastboot flashing boot. This command will boot the device into the Android Marshmallow Beta ROM. Note: It's recommended to completely power off the phone and then power it back on after flashing the ROM. This will also clear the cache. Do not try to do this without powering off the device. Source Alternative methods: Root your device. Then install a Custom ROM. Install TWRP (Fully working TWRP recovery doesn't exist yet for Nexus 5 so if you are installing ADB sideloader you can check first that you have this application). then install Fastboot (check in the README file included inside the ADB sideloader) install Chainfire's ADB sideloader and use fastboot. (although it will need ADB repo but not phone in order to work) install ADB sideloader and use fastboot. Touch your phone, turn it on. Install "fastboot-fix" from Google Play (if you do it, you can check that you have flash plugin installed for Android from this link) Conclusion
